Azalea Glen Nurseries

PHONE LOXLEY 274

BALDWIN COUNTY

Loxley, Alabama

Where U.S. 90 Meets Ala. 3

SEASON 1953 - 1954

THANKS

For your many visits and orders of the past season.

You are always welcome at the Azalea Glen Nurseries.

Our flowers this year have begun to open real early in September and October. We have had flowers from all the Diakagura family, High Hat Joshanu, Youtz, Kiyosu, Wards and the Pink, also, Pink Perfection, Clowers, Jr., Prof. Sargent, Alba Plena, K. Kikutogi Shiro-Daikagura and Arajishi. Stop by and let us cut you some flowers.

(The full color bloom on front cover of this catalog is a Glen 40)

CAMELLIAS

To you who live in the northern section of the U.S.A. You can have Camellias, too. They are easy to grow, just the same as other house plants, it takes time and care just the same as you give your other plants.

Keep plants well watered but not sloppy, if leaves on the plants turn yellow, try using rain water, and giving each pot plant three tablespoon-fuls of sulphur. Sulphur makes the soil acid. Camellias with buds do not like to be in a room that is too hot, keep them where it will be about 45 to 50.

Here in the south we must not plant Camellias too deep, we always here at the nursery plant them one inch higher than they were grown in the nursery row.

Always pick a balled and burlapped camellia up by the ball of soil, never by the stem.

We plant on firm ground, and have the hole dug larger than the camellia ball, so that we can put plenty of good soil mixed with peat-moss around the plant, never under, as placing soft soil under a balled plant will let it settle later on and your plants will be planted too deep.

We leave the burlap on our camellias when we plant them.

Always water well when planting and during all dry weather the first year.

Camellias with scale or red-spider should be sprayed with Volck; using it at the rate of one to seventy-five.

We fertilize our plants early in the spring, Feb.-March, and a light application in the fall.

If there is any information that we can help you with your plants, write, we are always glad to help.

Terms of Sale

We accept all orders on condition that they shall be void, should injury, beyond our control, befall the stock.

Prices listed cancel all previous quotations, and are subject to change without notice.

PAYMENTS

Cash with order. C.O.D. shipments will be made only when twenty-five percent deposit accompanies order.

Add Sales Tax for all Alabama shipments.

For all plants, baled and burlaped that are to be crated for shipment add the following to each plant.

18 to 24 inches	50c
24 to 36 inches	75c
36 to 40 inches	1.50

CLAIMS

We guarantee our stock to be true to name and properly packed.

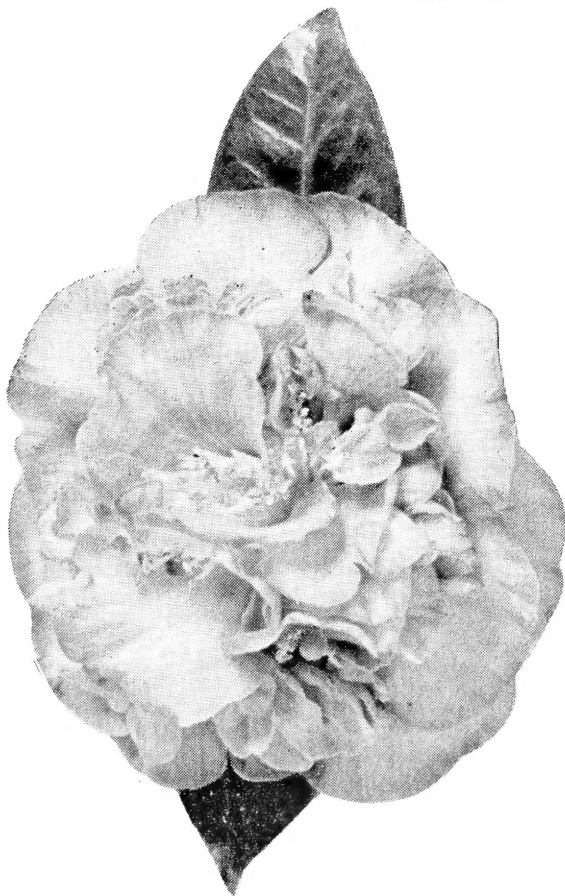

Our responsibility for delivery ceases when we have delivered the stock to the Transportation Company or Carrier .

We Close Sundays.

Phone Loxley, Baldwin County, 274.

H. L. WINDBIGLER

M. M. WINDBIGLER

(New Seedling)

(Snow On Mountain — Sasanqua)

(Showa No Sakae — Sasanqua)

Come and let us cut you a Camellia bloom as this young lady is doing.

You are welcome to come and see the thousands of blooms here at our nursery any time during the blooming season.

Flowers from September until April.

We are open for business from 7 a.m. to 5 p. m. on week days.

No business on Sundays.

AZALEAS

Growing Good Azaleas

Azaleas will grow in the sun or in the shade, in the sun you will have brighter colors. Azaleas can be used as pot or tub plants, in sections of the Country where the weather man gives too much ice and snow, for out-side planting.

Azaleas like acid soil, they love peat-moss, use plenty of it in the planting soil, or around your plants when placing them in the lawn.

A mixture of Peat-moss, leaf mold and cow manure make a very good soil to use in planting Azaleas.

We fertilize our plants early in the spring, using cottonseed meal, or any good Azalea fertilizer.

Keep well watered during all dry weather. For Scaevola and Red Spider, spray with Volck, using it, one to fifty. Plants can be dusted with sulphur for Red Spider.

Where there is any doubt if the soil is acid enough to grow good Azaleas, use aluminum-sulphate in your soil at the rate of one quart to a bushel of soil. Common sulphur can be placed around the plants and help, there is no danger as to the use, it will help with red spider.

Prune or shear your plants just as soon as they are through blooming, to keep them in whatever form you desire.

INDICA AZALEAS

This is the large flowering variety that grows so well here in the South. You will find them growing at Birmingham, Memphis, Little Rock, Tyler and Houston, Texas.

They want plenty peat-moss used in planting and plenty of water during the summer.

Elegans, Pink
Fielder's White
Formosa, Lavender
Gulf Pride, Bright Orchid Blue
Fishers, Pink
Pride of Mobile, Bright Red
Prince of Orange
Pride of Dorking, Red
